Dear Sir or Madam:

Subject: Application for Internship for Summer 2020 With reference to your advertisement on Mozilla's website, I am writing to propose my candidacy for your summer internship.

I am a second-year student in the IT engineering course of ESIEE Paris, a french engineering school, and I graduated from an intensive two-years math and physics course, which granted me an academic level in those fields. During my studies at ESIEE Paris, I learned various languages and algorithms, completing my set of known languages. As mentioned on my CV, I am a user of Rust, which is very useful to me in my free time, as I have a passion for cellular automata and this language developed by your foundation is perfect for that kind of use.

My CV also demonstrates my enthusiasm for math, which is not that common and permits me to have a different approach to programming problems, which could benefit your company.

This internship would benefit me for I want to start a career in free software, and your company would bring me the experience I need for that; plus, it would give me big-scale project experience in a professional context.

If you require any further information, I am at your disposal. I look forward to hearing from you at the earliest convenience.

Sincerely,

Clément Chomicki
